Introduction

To help our schools with their reporting, we offer a variety of customisable report templates and features to help improve the efficiency of their report-writing processes.

This document catalogues each of the reports available within the iSAMS system and should be used to help you identify which reports should be used for what purpose.

Group Analysis by Code		Groups only									

Parameters

When running each of these reports, there are a variety of parameters available which can be used to control what data is included within the report and how it looks.

Most of these parameters are the same across the reports, such as 'date range' or 'group by', though some are more specific to certain reports - like 'registration code'. These parameters will depend on the type of report and if you would apply them.

Generic Parameters

- 1. Date range**
This selects the dates that are used to filter the report by. Please note that these are inclusive. There are also drop-down options below each date, enabling you to auto-populate set dates like the start or end of term.
- 2. Times**
This gives you the option to filter by **AM**, **PM** or both. Alternatively, you can filter to selected times.
- 3. Pupil Filters**
Filter to certain pupils using group-based filters such as Divisions, Years, Houses, Gender, Ethnicity, Forms, Custom Groups (Set-up in pupil manager), Registration groups, SEN, and Current or Former pupils.
- 4. Pupil Selector**
Select a single pupil to filter the report to.
- 5. Ranges**
Filter the pupils selected based on number/percentage of Present, Absence or Not Registered.
- 6. Options**
The options available depend on which report is selected and will be covered in their relevant section.
- 7. Report Format**
Select how to export the report. Please note that these reports are only designed to work when exported as a PDF, so there may be some formatting problems if exported into other formats.

Specific Parameters

The following parameters listed are more specific to individual reports, depending on their purpose and your individual requirements.

1. Registration Codes

This parameter is used for any specific code reports. It filters the report to specific [absence](#) or [present code\(s\)](#), defaulting to all.

+ Registration Codes

Registration Codes:

All Present Codes S - Supper I - Illness E - Exam V - Interview	All Codes O - Unauthorised Absence I - Illness N - No Reason Yet Provided For Absence - - Other
---	---

2. Statistics and Monthly Statistics

These two are report-specific options that hide the registration statistics tables.

- Statistics

Statistics:

Statistics: Yes ☒ No ☐

Monthly Statistics: Yes ☒ No ☐

For example, the below table would be hidden if the Statistics option above was set to 'no'.

Registration Statistics	Count	%
Registration Count	14	
Present AM	3	21.4
Present PM	0	0
Present Count	3	21.4
Late	1	7.1
Authorised Absence	4	28.6
Unauthorised Absence	6	42.9
Absence Count	10	71.4
Not Registered	1	7.1

Individual Student Reports

The four reports in this section consist of three certificate reports for day/week/month and an individual registration report.

Each of these reports are focused on the individual pupils, breaking down their attendance alongside relevant statistics surrounding it.

The certificate reports are designed to be sent home with the reports containing the parental address and explanation of the codes.

The Individual report is like the 'certificate report by week' but with less formatting. This allows a larger date range to fit onto one page.

Certificate report by day

This report has the pupil's attendance broken down by day, with a row for each. It has registration statistics and a count of the codes given to the pupil for the relevant date range.

To improve its readability, it also includes the pupil's details, such as their home address, and an explanation for each of the codes.

Format:

- One page per pupil, with a table displaying the attendance for each individual pupil, a row per date and a column per registration time.
- [Registration statistics for count](#) and percentage of each registration code and category.
- A4 portrait.

Options:

- **Pupil Details:** This setting controls the display of the pupil details box, which contains the pupil's home address and other information.
- **Include Codes:** This option controls the display of the box at the bottom including the code names, explaining what each [absence code](#) stands for.
- **Group By:** This option sets how the individual pupils' pages are grouped so that pupils in the same Form/Year etc can be grouped together.

Please see an example of this type of report on the following page.

Certificate report by week

This report breaks down each pupil's attendance by week, with a row for each week. It has registration statistics and a count of the codes given to the pupil for the relevant date range.

To improve its readability, it also includes the pupil's details, such as their home address, and an explanation for each of the codes.

Format:

- One page per pupil, with a table displaying the attendance of each pupil, a row per week and a column per registration time. Each week has a statistical breakdown of the registration categories.
- [Registration statistics for count](#) and percentage of each registration code and category.
- A4 portrait.

Options:

- **Pupil Details:** This setting controls the display of the pupil details box, which contains the pupils home address and other information.
- **Include Codes:** This option controls the display of the box at the bottom including the code names, explaining what each [absence code](#) stands for.
- **Group By:** This option sets how the individual pupils' pages are grouped so that pupils in the same Form/Year etc can be grouped together.

Please see an example of this type of report on the following page.

Certificate report by month

This report breaks down each pupil's attendance by month, with a row for each month. It has registration statistics and a count of the codes given to the pupil for the relevant date range.

To improve its readability, it also includes the pupil's details, such as their home address, and an explanation for each of the codes.

Format:

- One page per pupil, with a table displaying the attendance for each individual, a row per week and a column per registration time. Each week has a statistical breakdown of the registration categories.
- [Registration statistics for count](#) and percentage of each registration code and category.
- A4 portrait.

Options:

- **Pupil Details:** This setting controls the display of the pupil details box, which contains the pupil's home address and other information.
- **Include Codes:** This option controls the display of the box at the bottom including the code names, explaining what each [absence code](#) stands for.
- **Group By:** This option sets how individual pupils' pages are grouped so that pupils in the same Form/Year etc can be grouped together.

Please see an example of this type of report on the following page.

Individual report

This report breaks down pupils' attendance with **total** and percentages for each registration group that the pupil is in, as well as overall in the selected date range. **Absence code** information is also listed at the bottom of the report.

Format:

- One page per pupil. The top table displays a breakdown of attendance per week for the pupil, with a row for the week and columns for the registration times. The second table displays the total and percentages per registration group, with an overall total at the bottom.
- Registration statistics are included as a count and percentage of each registration code and category.
- A4 portrait.

Options:

- **Include Codes:** This option controls the display of the box at the bottom, which includes the code names to explain what each **absence code** stands for.
- **Group By:** This option sets how the individual pupils pages are grouped, so that pupils in the same Form/Year etc can be grouped together more easily.

Please see an example of this type of report on the following page.

Student Analysis Reports

The following reports in this section focus on analysing student attendance, across the group and by option selected. Each of the reports offer different break downs of the attendance data across specific codes, days and times.

Student Specific Code Analysis

The student specific code analysis report displays a list of all the selected codes and the number that each pupil was given in the date range, like the list view in the registration module. The 'group by' option allows the report to be a total, displayed as either a single page per pupil or as a group (as the example below).

Format:

- A section spanning page(s) per group, with new rows per pupil per code and a total count of each. The total for each group is featured at the end of each group's section.
- A4 portrait.

Options:

- **Group By:** This option affects how the pupils are listed and how the totals are calculated, with a section for each grouping in the group - for example, one grouping per form.

Student Session Analysis

This report contains an analysis for the date range selected, sorted by the amount and percentage of each category of registration instead of by code.

Format:

- Sections spanning page(s) per group, with rows dedicated to each pupil and columns to each attendance category.

- Counts and percentages per registration category, including the totals for these for each group, are included at the bottom of the report.
- A4 portrait.

Options:

- **Group By:** This option affects how the pupils are listed and how the totals are calculated, with a section for each grouping in the group - for example, one grouping per form.

Student Session Analysis by AM/PM

This report displays the count or percentage of the registration category for sessions marked as AM and PM, in the given date range. This report also has a specific option of "Display" which controls if the report displays as a percentage or a count.

Format:

- Sections spanning page(s) per group, with each row dedicated to a pupil and each column marking an attendance category.
- Counts and percentages per registration category, with totals for these for each group, are displayed at the bottom of the report.
- Filter options are for **AM & PM** registration sessions only.
- A4 portrait.

Options:

- Display:** This option dictates if the figures display as a count or percentage.
- Group By:** This option controls how the pupils are listed and how the totals are calculated, with a section for each group in the 'group by' - for example, one per form.

Student Session Analysis Week Day

The student session analysis week day report displays the number or percentage of a selected attendance category in the given date range. This is split by week, to help identify any specific days that may be causing the pupil problems.

Format:

- Sections spanning page(s) per group, with one row per pupil and one column per weekday.
- The count of the selected attendance mark each day, with total for the group, features at the bottom of the report.
- Filter options are for **AM & PM** registration sessions only.
- A4 portrait.

Options:

- Display:** This option dictates if the figures display as a count or percentage.
- Attendance:** This option filters the report by attendance category.
- Group By:** This option controls how pupils are listed and how the totals are calculated, with a section for each group in the 'group by' - for example, one per form.

Student Session Analysis by Week

This report gives a count or percentage of a selected category of registration for each pupil, within a designated date range. This is totalled and split by week, so you can fit large date ranges on one page.

Format:

- Sections spanning page(s) per group, with a new row per pupil and a new column per week.
- The count of attendance type is displayed against the total number of possible sessions, with the overall total per group at the bottom of the report.
- A4 portrait.

Options:

- **Display:** This option dictates whether the figures display as a count or a percentage.
- **Attendance:** This option filters the report to display a particular category of attendance.
- **Group By:** This option controls how the pupils are listed and how the totals are calculated, with a section for each group in the 'group by' – for example, one per form.

Student Analysis by Code

This report displays percentages and counts of codes and registration categories within the given date range. The total for each of these within each group are displayed, along with the attendance code details at the bottom of the report.

Format:

- Sections spanning page(s) per group, with rows per pupil and columns per attendance code. This is followed by a series of columns for each registration category.
- Count/percentage for each registration code is followed by count and percentage for each registration category.
- A4 portrait.

Options:

- Include Codes:** This option controls the appearance of the box at the bottom of the report, which contains code names to explain what **absence type** A is, aiding readability for the recipient.
- Display:** This option dictates if the figures display as a count or a percentage.
- Group By:** This option controls how pupils are listed and how the totals are calculated, with a section for each group in the 'group by' - for example, one per form.

Analysis by Registration Group

This report displays the number or percentage of a specific code in the date range. This is split by the registration group, to help identify specifics based on which lesson or group the attendance was taken for. Each column is totalled for the relevant group selected.

Format:

- Sections spanning page(s) per group, with rows per pupil and columns for each registration group.
- Count/percentage of the selected registration type is included for each registration group.
- A4 portrait.

Options:

- **Display:** This option dictates whether the figures display as a count or a percentage.
- **Attendance:** This option filters the report by attendance category.
- **Group By:** This option controls how the pupils are listed and how the totals are calculated, with a section for each group in the 'group by' – for example, one per form.

Complete Registration Reports

This section of reports displays attendance details for a selected group within specified date ranges. The reports highlight all the attendance codes given to the pupils for each period, broken down by day/week/month, with the status report filtering to a specific category of registration.

Student Group by Day

This report is designed to give a quick overview of the attendance codes given to pupils per day in the group. It has a row per pupil and displays a page per group, repeating this for each day in the date range.

Format:

- Sections spanning page(s) per group per day, with rows per pupil and columns per registration time.
- It features the attendance code given in each session.
- A4 portrait.

Options:

- **Group By:** This option dictates how the pupils are listed, with a section for each group in the 'group by' - for example, one per form.

Student Group by Week

This report is designed to give a quick overview of the attendance codes given to pupils per week in the group. It has a row per pupil and displays a page per group, repeating this for each week in the date range. It also has the attendance codes detailed at the bottom, to explain what each code means.

Format:

- Sections spanning page(s) per group, per week, with a new row for each pupil and columns per week day, per registration time.

- The attendance code is given in each session.
- A4 portrait.

Options:

- **Include Codes:** This option controls the display of the box at the bottom of the report, with the code names to explain what absence type A is.
- **Group By:** This option dictates how the pupils are listed, with a section for each group in the 'group by' – for example, one per form.

Student Group by Month

This report displays attendance details as well as a statistical analysis for each pupil and every day for each month. It has a row for each pupil, with one page per group, and repeats this format for each month in the date range. Attendance codes are also detailed at the bottom, to explain what each code means.

Format:

- Sections spanning page(s) per group, per month, with one row per pupil and one column per day, per registration time. This is followed by attendance categories columns.
- The attendance code is given in each session, followed by count and percentage for each attendance category for the pupil.
- The total for each registration category features at the bottom of the report, alongside a breakdown of the registration categories for each day.
- A4 Landscape.

Options:

- **Include Codes:** This option controls the display of the box at the bottom of the report, which details the code names to explain what absence type A is.

- **Group By:** This option dictates how the pupils are listed and how the totals are calculated, with a section for each group in the 'group by' – for example, one per form.

Student Group Status

This report displays pupils' attendance details for each group in an easy-to-read format. It includes the reason and late time, to provide more information about why each code was given and how late they were. The report features a row per pupil and time, with a section for each group. It also totals up the number of each category for each group.

Format:

- Section per group spanning across page(s), with rows per pupil per session.
- Includes a count of the selected attendance type, reason and the late duration if late.
- The group and overall totals feature at the bottom of the report.
- A4 Landscape

Options:

- **Include Codes:** This option controls the display of the box at the bottom of the report, including the code names to explain what absence type A is.
- **Attendance:** This option filters the report by attendance category.
- **Group By:** This option controls how the pupils are listed and how the totals are calculated, with a section for each group in the 'group by' – for example, one per form.

Please see an example of this type of report on the following page.

Teaching Group Reports

This section of reports displays registration and attendance details for selected teaching groups within specified date ranges.

Student Group Attendance by Sessions

This report details all the registration data of a selected category, in one session, for each pupil in the group. This has a row per pupil, a section for each group and repeats this format for each session. It also includes absence reasons and the codes at the bottom, providing more details of the registration.

Format:

- Section per group, per registration session, spanning across page(s) and with one row per pupil.
- The report includes type, statistical type, code and reason given to the pupil in the session.
- A4 Landscape

Options:

- **Include Codes:** This option controls the display of the box at the bottom of the report, which includes the code names to explain what absence type A is.
- **Attendance:** This option filters the report by attendance category.
- **Group By:** This option dictates how the pupils are listed and how the totals are calculated, with a section for each group in the 'group by' – for example, one per form.

Student Group Attendance by Specific Code

This report details all the sessions that have the selected codes for each pupil in a group. It can be used to easily identify all the instances of a code for each year group in the date range.

Format:

- Section per group spanning across page(s), with rows per pupil per session.
- The report includes the count of the selected attendance type, and the reason and late duration if late.

- The group and overall totals are featured at the bottom of the report.
- A4 Landscape

Options:

- **Group By:** This option dictates how the pupils are listed and how the totals are calculated, with a section for each group in the 'group by' – for example, one per form.

Group Analysis Reports

Attendance by session

This report displays the total number of a category, by session, for each group. It has a section per session and a row per group, with a total count of the category and pupil number.

Format:

- Single section for all groups spanning across page(s), with rows per group.
- The report includes a count of the selected attendance type and pupils in group.
- A4 Portrait

Options:

- **Attendance:** This option filters the report by a specific attendance category.
- **Group By:** This option dictates how the pupils are listed and how the totals are calculated, with a section for each group in the 'group by' – for example, one per form.

Group Attendance by Session - Present Marks

Session Analysis

This report displays the total number and a percentage of each registration category for each selected group within a date range.

Format:

- Single section for all groups spanning across page(s), with rows per group and columns per registration category.
- The report features the count of the registration total, along with the count and percentage of each attendance category.
- A4 Portrait

Options:

- **Group By:** This option dictates how the pupils are listed and how the totals are calculated, with a section for each group in the 'group by' – for example, one per form.

Session Analysis AMPM

This report displays the total number or percentage for the [AM and PM registration slots](#) for a registration category, for each group within a date range.

Format:

- Single section for all groups spanning across page(s), with rows per group and columns for AM and PM per registration category.
- The report features the count of the registration total, alongside the count and percentage of each attendance category.
- The report can be filtered to [AM and PM sessions](#).
- A4 Portrait

Options:

- **Display:** This option dictates whether the figures display as a count or a percentage.
- **Group By:** This option controls how the pupils are listed and how the totals are calculated, with a section for each group in the 'group by' – for example, one per form.

Session Analysis Week Day

This report displays the total number or percentage for the **AM and PM registration slots** for each weekday, and the registration category for each group in a date range. It also has a row for each group in the group by, which can be useful for identifying weekday trends across the different groups at a glance.

Format:

- Single section for all groups spanning across page(s), with rows per group and a column for each weekday split by AM and PM.
- The report includes the count or percentage of a selected attendance category, with the total split by AM and PM.
- A4 Portrait

Options:

- **Display:** This option dictates whether the figures display as a count or a percentage.
- **Attendance:** This option filters the report by attendance category.
- **Group By:** This option controls how the figures are calculated and how the rows are generated, with it being one per group in the 'group by' - for example, one per form.

Session Analysis Week

This report displays the total possible sessions and the total of a specific category of attendance, for each week and group. It includes a row per group and a total across the groups.

Format:

- Single section for all groups spanning across page(s), with a row per group and a column for each week.
- The report includes the count or percentage of a selected attendance category, with a total for each week featured at the bottom of the report.
- A4 Portrait.

Options:

- **Display:** This option dictates whether the figures display as a count or a percentage.
- **Attendance:** This option filters the report by attendance category.
- **Group By:** This option controls how the figures are calculated and how the rows are generated, with it being one per group in the group by – for example, one per form.

Analysis by Code

This report displays the total of each code given to the group within the date range, following some analyses. It features a row per group and columns for each attendance code, with the total number of each displayed at the bottom. It also includes details of the attendance codes at the bottom, to explain each type.

Format:

- Single section for all groups spanning across page(s), with rows per group and a column per attendance code, followed by a column per category.
- Count or percentage of each attendance code followed by count and percentage of each category.
- Total for each code, count and percentage of each category.
- A4 Landscape

Options:

- **Include Codes:** This option controls the display of the box at the bottom of the report, which includes the code names to explain what absence type A is.
- **Display:** This option dictates whether the figures display as a count or a percentage.
- **Group By:** This option controls how the figures are calculated and how the rows are generated, with it being one per group in the group by – for example, one per form.

Registration Reports

History of Changes

This report displays the changes made to a pupil's attendance within a select date range, as well as who the changes were made by. It features a row per pupil in each section and is repeated for each group.

It can be used to keep track of changes made within the attendance module, in addition to being useful when correcting any mistakes made to the register I.E., overwriting an X with an A by easily finding the previous code.

Format:

- Sections for all groups spanning across page(s), with rows per Pupil per change.
- The report details the registration teacher, the registration time, the code used and the date it was entered, and who by.
- A4 Portrait.

Options:

- **Include Codes:** This option controls the display of the box at the bottom of the report, which includes the code names to explain what absence type A is.
- **Group By:** This option controls how the figures are calculated and how the rows are generated, with it being one per group in the group by – for example, one per form.

Please see an example of this type of report on the following page.

History of Changes

11/08/2017 - 28/06/2018

Years: 11

Group By: Year

Year: 11

Replacements for old reports

The following are legacy reports that are no longer supported by iSAMS and are included in this document to allow you to find a replacement.

Registration status report

This historic registration report displayed registration details for pupils for each registration session. This has since been replaced with the [Student Group Registration Status](#) report. This report can be found under Complete Register Reports > Student Group Status. This report has updated formatting to match the other inbuilt reports and provides more filtering options for the user.

Parameter settings

The two reports generate in the same way based on the parameters populated. The exception to this is by default the old registration status report had all attendance categories selected where the Student Group Status report requires them all to be highlighted and defaults to just include present pupils.

Registration Matrix

This historic registration report lists the attendance marks for each pupil in a group per day in a matrix style format with totals. The [Student Group by Day/Week/Month](#) provides the same information but in a better format. They can be found within the Complete Register Reports section of the reports.

Parameter settings

The settings for the two reports are similar with there being more options in the student group reports. The exception to this is with the old report there is an option to filter to just present/absence/Late. This isn't possible in the Student Group reports however the ranges option can be used to filter to pupils with a certain amount or percentage of each type.

Registration Summary Report

This report displayed the total amount of present, absent and unauthorised absences with their percentages. This has been replaced by the [Student Session Analysis](#) report which displays the same information but with the updated formatting. This can be found within the Student Analysis Reports Section > Session Analysis.

Parameter settings

The two reports generate in the same way based on the parameters populated. The inbuilt report has more filtering options and easier to use parameters.

Attendance Summary

This report displayed the total amount of present, absent and unauthorised absences, with their percentages for each pupil. There are a few reports that have replaced this with enhanced formatting, but we'd recommend the [Certificate by Month](#) report.

Parameter settings

The two reports generate in the same way based on the parameters populated, but the inbuilt report has more filtering options and its parameters are easier to use.

Out of School

This report displayed out of school details for a given date range and, though there isn't a direct replacement for this report, all reports include the out of school data just without the relative date ranges. The date ranges can easily be found in the out of school tab along the top of the reports. The Registration Status Report on the wizard bar can also be set to only display out of school pupils, by navigating to: Configuration > Desktop Tab, and changing the option to 'Out of School'.

Not Yet Registered

These 3 not yet registered reports displayed the pupils that haven't been registered. The formatting was either displaying the pupil names or just a summary per group. There are many replacements for these reports, depending on which format you'd most like to use. The [Student Group Status](#) report is the best for the list of pupils and the [Attendance by Session report](#) displays the total per group along with the teachers.

Parameter settings

The inbuilt reports have more options available for filtering and only require the option 'Not Registered' to be selected to work in the same way as the old report.

Historical Data Reports

These 3 reports displayed attendance data and leaver information for pupils. All the inbuilt reports have a tick box to include/exclude former students, although don't include the leaver date. Depending on the format required, the [Student Group by Month report](#) displays it similar to the matrix, whilst the [Student Group Session Analysis report](#) displays like the summary version of the report.

Parameter settings

Please note we recommend ensuring that the tick box to include former students is selected for any of the inbuilt reports, though this will be ticked by default. Further to that, the inbuilt reports have more filtering options that enable you to select specific pupils.

Custom Registration Reports

If you would like a completely bespoke report for use within registration, or if you would like a modified version of a standard report, then this can be done via the Custom Registration Reports tab. In this section you have the option of running your own report or if you would prefer, we can create a custom report for you for this section with the same flexible parameters

If you would like iSAMS to create a custom report for you, simply complete the “General Report Request Form”, available from iCommunity, and send it along with a mock-up of how the report should look to the helpdesk. Further information on the custom report development process can be found on iCommunity.

Key

R#, Reg#, Registration Count: This is the total of possible registers for the pupil or group in the given date range. This is calculated based on the number of registration sessions the pupil should be in, worked out via the rules in the registration dates and times (found in the registration configuration tab).

AM: This is used to break figures down to the registration session that is set as the type 'AM'. This is set in registration configuration tab > Registration Dates & Times for each of the registration sessions.

PM: This is used to break figures down to the registration session that is set as the type 'PM'. This is set in registration configuration tab > Registration Dates & Times for each of the registration sessions.

/, \: This stands for present AM and present PM respectively. This is worked out based on time rather than the session being marked as 'AM' or 'PM', any present for a session before 12:00 will be given a / and any after 12:00 will be given a \.

L, Late: This is for the type; late registration and requires the late option to be enabled in the configuration. This is set in the registration rule that is used for the session. This is set in Configuration > registration Rule. You can see which is being used in the Registration Dates & Times. Please note on the register it may appear as either a late button or present with another box to state if its late, this is dictated by the option in configuration > register settings > Late recording drop down.

Absence count: This accounts for all absence, which includes any register when any absence code is entered. These codes are created in registration configuration tab > Registration Codes.

A, Auth. ABS: This accounts for all authorised absences entered for the pupil or group in the date range. An absence is authorised when the authorised absence tick box is ticked for the code, this can be found in registrations configuration tab > Registration Codes > select the code > edit Registration Code.

U, Unauthorised Absences: This accounts for all unauthorised absences entered for the pupil or group in the date range. An absence is unauthorised when the authorised absence tick box is not ticked for the code, this can be found in registrations configuration tab > Registration Codes > select the code > edit Registration Code.

NR, Not yet registered: This is any possible session for that pupil or group that is yet to be set as present, late or absent

Absence codes: These are the main codes in the system and list all the absence codes available when taking the register and marking someone as absence (N). These are created in registrations configuration tab > Registration Codes. Note these need to be enabled in the registration rule by ticking the Include Absence Code tick box for the given rule to be available for use. If not, any pupil marked as N will be given a default code.

Present Codes: These codes are additional codes available when marking a pupil as present (Yes). These can be used to add additional information to a present I.E. to say they are in the school but in exams. These are created in registrations configuration tab > Registration Present codes. Note these need to be enabled in the registration rule by ticking the Include Absence Code tick box for the given rule to be available for use. If not, any pupil marked as either / or \ depending on the session.

Government Codes: These codes are used mostly for the census and CTF functions and aren't returned on the reports. These are limited to the codes provided by the government and link to absence codes so that on returns the absence codes are converted to the government ones. Note government codes can be linked to as many absence codes as required. This is done in the registration configuration tab > registration codes using the Government Code drop down.
